PROFILE

DevOps engineer responsible for OTICAMP's operations across two physical servers and approximately 4–5 VPSs, after taking over from a senior engineer three months into the role. Linux, Docker, Ansible hardening, GitHub Actions CI/CD, monitoring, and backup recovery in connected and air-gapped environments. Python and Go for services and tooling.

EXPERIENCE

DevOps Engineer · OTICAMP (Employment)

Jun 2025 — Present · Tehran, Iran

- Recovered the primary VPS and its services from backups after the hosting provider deleted the instance.
- Operate company services primarily with Docker across connected and air-gapped environments, including Jira, Confluence, GitLab, and Matrix.
- Maintain Nextcloud, MinIO, n8n, and Dekploy services; administer DirectAdmin and cPanel hosting environments.
- Apply Ansible hardening across all managed machines.
- Own backups, monitoring, and critical-incident alerts; operate Prometheus, Grafana, Zabbix, PRTG, and OPNsense.
- Build and maintain CI/CD pipelines and workflows using GitHub Actions.

Founder & Engineer · Nerkhbaan (Own product)

2026 — Present · Tehran, Iran

- Built the FastAPI, TimescaleDB, and Redis backend, a Go feed sidecar, the React web and admin apps, and an Electron desktop app.
- Deployed release 2.8.1 in October 2026 on Docker Compose with two API replicas behind Nginx, after 15 CI jobs including integration, browser, and Trivy checks.
- Load-tested an isolated copy of the stack: 27,000 of 27,000 requests succeeded over 30 minutes, p95 323 ms.

Co-founder, Lead Developer & IT Lead · Dolphin CRM (Co-founded product)

2026 — Present · Tehran, Iran

- Lead development of the Django and PostgreSQL application: 46 feature flags and about 3,640 automated tests.
- Designed the deployment model: an isolated Compose stack per installation, a signed feature manifest, and non-superuser database roles with per-table grants.
- Built scripted deploy and rollback and backups that are verified by restoring them.

DevOps & Linux Administrator · Self-employed (Freelance)

Dec 2024 — Jun 2025 · Remote

- Wrote Bash automation for routine maintenance, backups, and log rotation.
- Audited client servers; configured firewall rules and TLS certificates.
- Tuned Nginx and Apache configurations, including reverse proxying and load balancing.

SELECTED PROJECTS

Nerkhbaan · Founder & sole engineer — github.com/Ilia-Shakeri/Nerkhbaan

A price platform for gold, currencies, and crypto with history, alerts, and web, admin, and desktop apps. Every quote names its source and time and carries an explicit expiry, so an outdated price is never shown as current. Status: Production and 10+ users documented · October 2026.

FastAPI · TimescaleDB · Redis · Go · React · Electron · Docker Compose · Nginx · GitHub Actions · Prometheus · Trivy

Dolphin CRM · Co-founder · Lead developer & IT lead — iliashakeri.ir/projects/#dolphin-crm

A Persian-first CRM/ERP for sales, quotations and invoicing, payments, inventory, telephony, and after-sales. One codebase is deployed separately for each customer, and each installation runs as its own isolated Docker Compose stack. Status: Use at 2+ companies reported · October 2026. Source code private; public case study linked above.

Django · Python · PostgreSQL · Docker Compose · Nginx · Gunicorn · Asterisk · Selenium · GNU Bash

Stackplore · Author & sole engineer — github.com/Ilia-Shakeri/Stackplore

A self-hosted DevOps workspace that connects Docker and Kubernetes telemetry to incident investigation. I built its Go backend and bilingual interface; the version 2 preview adds evidence-linked incident reports and an opt-in local-model assistant with scoped, permission-checked reads. Status: Stable 1.x available · version 2 preview in development.

Go · PostgreSQL · Kubernetes · Docker · Helm · OpenAPI · React · TypeScript

Prometheus & Jira to Matrix bridges — github.com/Ilia-Shakeri/n8n-prometheus-matrix-bridge

Two n8n workflows that bring Prometheus alerts and Jira updates into the team's Matrix chat. Alertmanager webhooks become colour-coded firing/resolved messages with a link to the Prometheus graph.

n8n · Prometheus · Matrix · Jira

Also: Matrix User Manager (GNU Bash), LinSecGuard (GNU Bash), SysTrack (GNU Bash), Automated Backup Script (GNU Bash), EasyCert (OpenSSL), CipherCert (Python), Clockwork OrangeHRM (GNU Bash).

TECHNICAL SKILLS

Linux & infrastructure
Linux, Ansible, systemd

Delivery & automation
GitHub Actions, Git, GNU Bash

Web, network & security
Nginx, Keycloak, Trivy, UFW / iptables

Languages & frameworks
Python, Go, FastAPI, Django

Containers & orchestration
Docker, Docker Compose, Kubernetes, Helm

Monitoring & observability
Prometheus, Grafana, Loki

Data & messaging
PostgreSQL, TimescaleDB, Redis

Collaboration & ChatOps
Matrix, Jira, Telegram Bot API

EDUCATION

B.Sc. Computer Science
In progress · since Oct 2026

Comprehensive Data Science Program
University of Tehran (online) · In progress · May 2026 – Aug 2027 (planned)

LANGUAGES

Persian (native) · English (professional working)
